Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' amendment filed July 27, 2005 and the arguments therein. Applicants' arguments were persuasive. The closest prior art of record fails to teach or fairly suggest a catalyst complex comprising a transition metal and a phosphorus-containing ligand(s) capable of dimerizing, wherein the distance between phosphorus atoms of the dimerized ligand is at most 5 Angstrom, as claimed herein. In light of the comparative data in tables 3 and 4 of the instant specification, and the fact that the prior art does not suggest that such ligands, having a specific maximum distance between phosphorus atoms, would have an influence on the selectivity to aldehyde products, the examiner has withdrawn the rejection of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Art Unit: 1621

Authorization for this examiner's amendment was given in a telephone interview with applicants' representative, Jason Voight on September 29, 2005.

The application has been amended as follows: claim 21 has been cancelled.
